SPECIFICATIONS

Prefixes, Suffixes, Etc.

HYATT: Specify all prefixes and suffixes connected to the bearing number with a Hyphen. RA (Roller Assembly), OR (Outer Race) and IR (Inner Race) are purely descriptive and not a part of the Part Number if NOT connected to the number with a Hyphen.

A.T.B.: "A" or "AT" prefix is a part of the part number—always show when ordering.

TIMKEN®: All prefixes and/or suffixes shown should be specified when ordering.

NEW DEPARTURE: Prefixes and suffixes printed together with bearing size number such as CT30F, H5310A, 3211-62, 47509A45, etc., indicate size differences from standard. The suffixes shown below indicate variations from standard bearing specifications as shown opposite each:

SUFFIX

L—Loose internal fit-up.

T—Tight internal fit-up.

W—W. Dbl. Row—Reversed Angles of Contact; e. g.
5306W X1730 A.

XY1 C (or XY1 A)—Special low speed noise test, "C" slush (or "A" slush).

L1214 A—Etch end play symbol on brg., "L"—loose end play, "A" slush.

X1241 A—No Snap Ring, "X"—standard internal fit-up, "A" slush.

X1250 A	{	No Snap Ring, special noise test.	}	A combination of
L1250 A				

X1270 A—Special test for smoothness and quietness.

T1352 A—Special width tolerances and special noise test.

T1419 A—Special test for quietness and runout tolerance.

X1425 C—Brass slinger on long end of shaft.

S1446 —Special end play tolerance, "C" slush $\frac{1}{4}$ full, and extra quiet.

X1448 G—Special tolerance long shaft length, shafts Cadmium plated.

X1468 C—Special min. limit on cone stickout beyond seal.

S1581 C—Special end play, special cone stickout limit, "C" slush.

X1730 A—Special width tolerances and special noise test.

X1756 A—Special noise test, special limits on O. D. and dimension from face of cup to far side of Snap Ring.

EXAMPLE: 47106 X1241 A is without Snap Ring—it is OK to substitute a standard 47106 if Snap Ring is removed and mechanic told to "Use Old Snap Ring." (Same true of "1250").

ANTI-FRICTION BEARINGS DATA 1946-57

A-357

1957 EDITION

THIS Catalog is published in the interest of automobile service and repair men. Its purpose is to identify the various Anti-Friction Bearings used on motor cars by type and number so that when in need of replacement they can be ordered or called for by make and number.

THE CONTENTS

The Catalog will become indispensable to the service men of the country as it contains essential bearing data on more than 90 per cent of the cars and trucks which they have occasion to service. In the catalog is a complete and conveniently arranged listing of bearings applications including Ball Bearings, Tapered Roller Bearings, Straight Roller Bearings, and Thrust Bearings.

Car applications are given on the popular makes of cars from 1946 up to and including 1957.

Ball Bearing data is designated by the New Departure Ball Bearing number.

Straight Roller Bearing data is designated by the Hyatt Roller Bearing number.

Thrust Bearing data is designated by the A. T. B. Bearing number.

Tapered Roller Bearing data is designated by the Timken Roller Bearing number, or Hyatt number.

NOTE: United Motors Service does not supply Timken ® Tapered Roller Bearings or Thrust Bearings. These are listed so as to make this Catalog a complete and convenient handbook on the most frequently used bearings. We wish to acknowledge the courtesy and the cooperation of The Timken Roller Bearing Company and the Automotive Thrust Bearings Corporation.

HOW TO ORDER

United Motors Service Bearings Distributors are in position to supply New Departure Ball Bearings and Hyatt Roller Bearings.

The majority are also in position to supply tapered roller bearings and thrust bearings.

Order by part number from any United Motors Service Bearings Distributor.

This catalog covers over 85% of the total number of cars and trucks on the road.

When bearings are needed for the occasional makes and models of cars or trucks not covered in this catalog, your United Motors Bearings Distributor will supply you.

Be sure to provide your distributor with all available data such as:

1. Make, model and year of car, truck or tractor.
2. Location on car, such as "front wheel, inner" or "pinion shaft, rear."
3. Car factory part number, if available.

Or

Send the distributor the bearing for identification.
